A NEW VISION OF ETERNAL MATERIALS

Through-body porcelain tile

BLOOM

Bloom is conceived from the fusion of small and large fragments of different marbles. The watercolour effect softens the edges reproposing them as marble petals, while the insertion of small floral details within certain areas turns the decoration into a completely new wallpaper effect. Designed in large slab to create a true focal point, as a background to the dining room or as a characterising feature of a bathroom or of a hotel lobby. In the tiling format, it becomes an abstract composition that reinterprets the flooring of XXL Venetian terrazzo immediately attracting attention and offering spaces rich in style.

CALACATTA ORO

A very rare and precious Italian white marble that is considered the gold of marble. Its dominant characteristic that distinguishes it from all the other Calacatta is that of having “veins” of various sizes that migrate from “warm grey to beige” with small inclusions of “rust/gold” colour.

The very pure and luminous background takes on a “milky” hue that makes it elegant and less minimalist.

The large 120x260 tiles transform the kitchen area into a beautiful and refined total look. The wood effect accentuates and warms the sophisticated atmosphere created.

Lend elegance and style to cozy everyday spaces. The bathroom wall tiles feature a fern design decorated with gold-effect metal applied directly to the ceramics with an innovative technique.

ONICE FANTASTICO

Fantastic onyx has a reddish base crossed by transverse veins with various colour shades: white, cream, hazelnut, brown and aqua green. These beautiful colours make it a true work of art, unrivalled and easy to combine with the cement and wood effect. It becomes the ideal material for anyone seeking to be unique and to make their own individual mark.

CALACATTA

The Italian calacatta marble on which this material is based comes from the Carrara area and features a particularly bright white background, shot through with medium-sized grey veins and nothing else. The surface, whether glossy or natural, creates a contemporary mood and is ideal for pairing with concrete and wood-effect materials.

INVISIBLE GRAY

More similar to an expressionism painting than the renowned Turkish marble, this slab features discontinuous veining running in all directions. A timeless atmosphere is created in every room, bringing balance to the architectural design. Its featured pattern also makes it ideal for kitchen tiling and for table tops.

AMANI

—————

This slab was born by a re-interpretation of the refined Amani marble's warm tonality, bringing on an enveloping impression characterized by mysterious flashing lightnings that leave deep and lasting veining. Rooms covered with these slabs turn into welcoming and relaxing places, real havens of peace and relaxation. Its exclusive color turns to be perfect for refined and valued environments, from hotels to luxurious residences.

ZEBRINO

Surfaces inspired by the striped marble from Apuan Alps feature a beige background and are crossed by almost linear stripes. Porcelain gres free interpretation of this marble enhances the natural look of the color still keeping the elegant and light veining. Suitable for every room of the daily life, Zebrino can be a fitting scenery in a strong personality interior design.

SILVER

Featuring a grey background and thin tone-on-tone and anthracite veining, this material creates designs with great, natural beauty. Ideal for both business and personal settings, it brings nature into the everyday realm, with style and an individual touch.

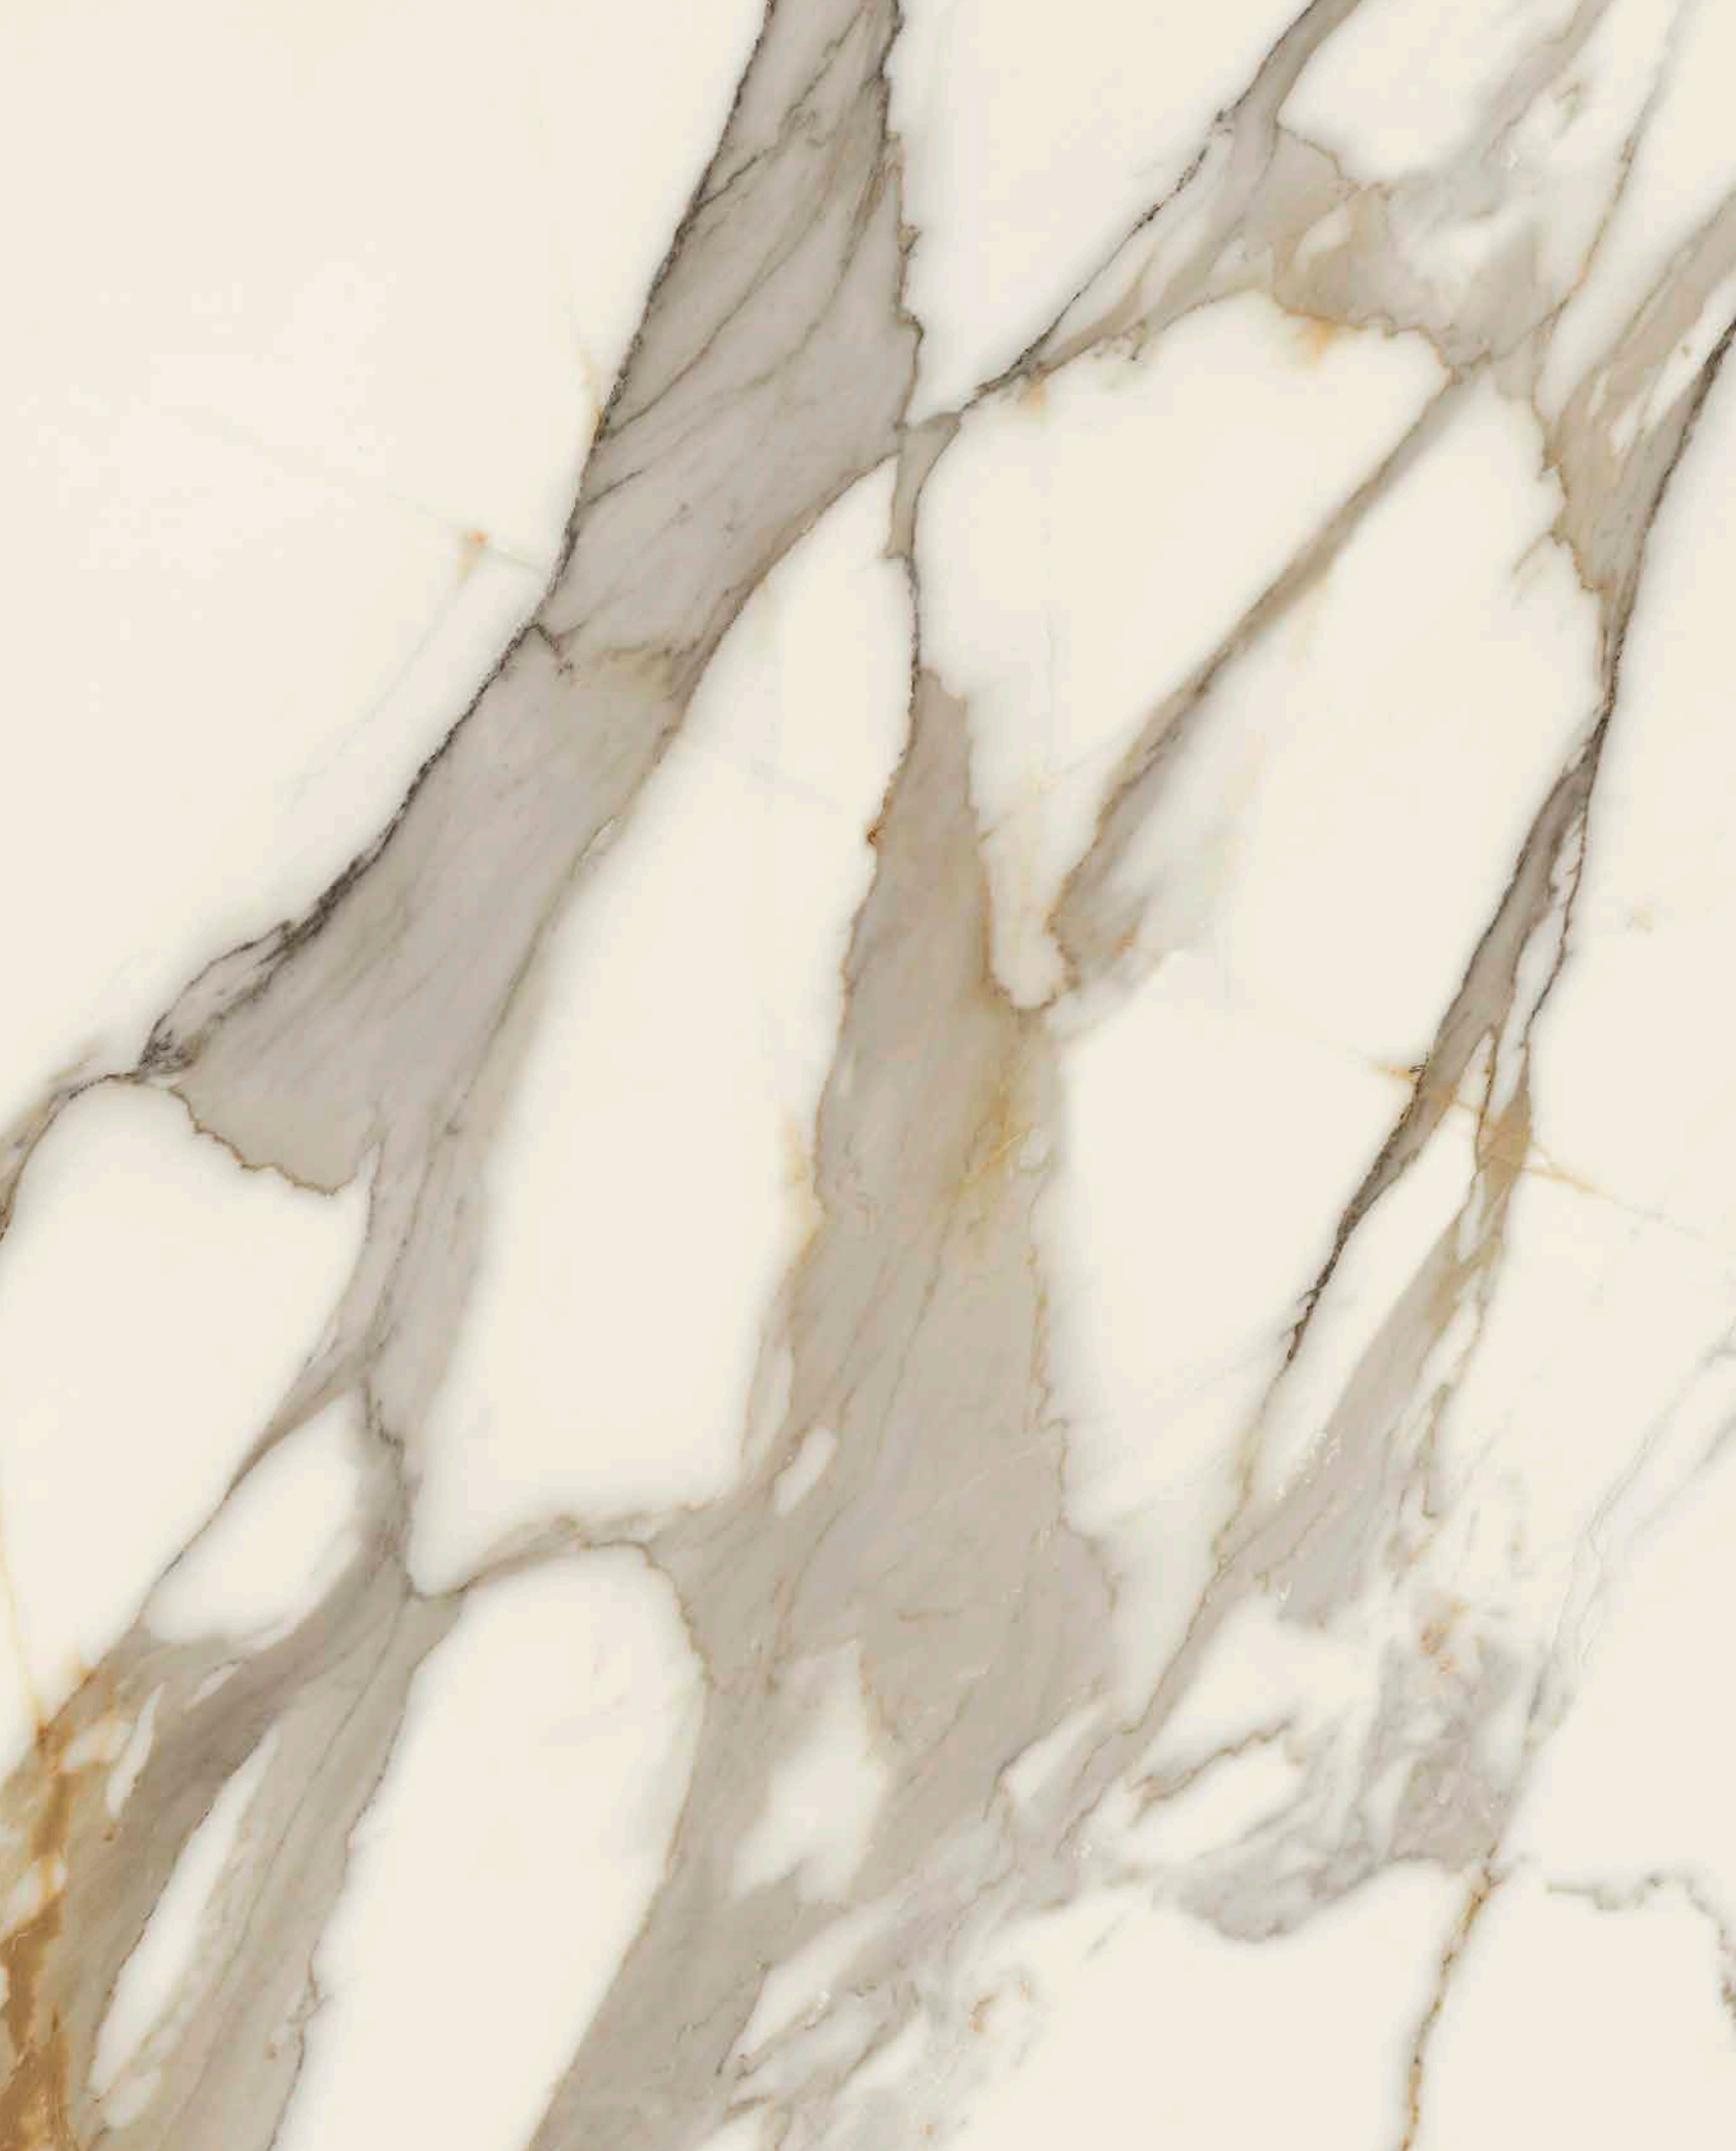

NOISETTE

This free re-interpretation of an italian marble called Fior di Bosco is characterized by a color varying from black to gray with warm shades and enriched by little light veining. Simple but elegant, it is suitable for every kind of setting: a slab with and elegant and metropolitan look. Its sobriety without austerity makes it perfect when matched with lighter colors slabs.
