NATIVA  
PURE STONE

---

The dialogue between the natural universe and the human dimension has given birth to the Nativa collection, with the warm, delicate beauty of travertine, a timeless material which brings a simple elegance to contemporary spaces.

Nativa is characterised by absolute matching between graphic design and structure, which generates visual depth and a rich tactile experience.

Vena and Falda reproduce the different ways blocks are cut in the quarry: the two strongly contrasting, visually striking graphic designs are available in a wide assortment of sizes in 6 - 9 - 20 mm thicknesses.

The collection is enhanced by the unique, structured Lapis and Armis products.
