Confirming its commitment to innovation in the US porcelain tile industry, Florim USA, manufacturer of the MILE[®]stone brand, proudly introduces Digital Texture[™]. This pioneering technology represents a significant leap forward in enhancing surface aesthetics, seamlessly integrating texture with digital graphics to offer a tactile experience reminiscent of natural materials.

Digital Texture[™] not only produces surfaces with precise dimensions and realistic detail but also optimizes production efficiency. By streamlining the production process, it reduces material waste, lowers energy consumption, and increases design flexibility, aligning perfectly with Florim USA's dedication to sustainability.

Our products positively contribute to the requirements for obtaining the LEED (Leadership in Energy and Environmental Design) and WELL (IWBI) certifications.

A commitment to environmental sustainability and responsibility

We are committed to conscious development that minimizes the negative impact of manufacturing production on the environment. Our general approach to sustainability intersects with our business strategy to embrace three areas of responsibility: economic, social, and environmental. Some ways we prove this are:

- Products containing as much as 45% recycled content.
- Post-consumer recycled content levels as much as 3%.
- Zero industrial wastewater discharge.
- A 99% internal process recycling rate.
- Local sourcing of >95% raw materials (within 500-mile radius of factory) resulting in low transportation related carbon emissions.

MILE[®]stone is taking these and other steps, as well as actively investing to reduce carbon emissions to ensure that we reach full carbon neutrality.
