03. RECOMMENDATIONS / RECOMENDACIONES

WAREHOUSING

In order to guarantee the characteristics of the finish the product must be kept in its original packaging until the time of fixing. If the product is likely to be stored for a long period of time it should be suitably covered.

TILE FIXING

To ensure the products adhere correctly to the surface, it is essential to use specific adhesive and grouting material. This must also be suitable for the environment they will have to withstand. Fitting with traditional mortars does not ensure good adhesion.

Due to the nature of the material there may be dimensional variations between pieces. Therefore, all types of joints must be planned and carried out correctly: structural, perimeter, expansion and installation joints. Fitting tiles without joints is not advisable from any technical point of view as this may lead to various problems. For an optimal result, we advise to use 1 mm (0.04").

MAINTENANCE AND CLEANING

Once the materials have been fitted, it is advisable to remove any remaining adhesive and grouting material by using a commercial descaling product designed especially, diluted with water. The descaling product must not remain in contact with the surface to be cleaned for more than 5 minutes.

As a general guideline, powder detergents should not be used, not wire wool or abrasive materials. Generally a sponge will be sufficient with warm water and liquid neutral soap. Then rinse with plenty of clean water.

STRONG CHROMATIC VARIATION

Fez Collection has been designed with a strong chromatic variation between pieces. Prior to any installation, range of tiles should be checked by the client. No claims will be accepted after installation.

04. TECHNICAL FEATURES / INFORMACIÓN TÉCNICA

Technical features for Dry-Pressed ceramic tiles with water absorption BIII (Eb >10%)

FEATURES / CARACTERÍSTICAS	SPECIFICATION / ESPECIFICACIÓN	NORMA
 Dimensional Features	62 mm +/- 0,75 mm x 125 mm +/- 0,75 mm	UNE-EN ISO 10545-2:1998
 Water absorption	$E_b > 10\%$	UNE-EN ISO 10545-3:1997
 Modulus of rupture and breaking strength	Thickness $\geq 7,5$ mm mínimo 12 N/mm ² Thickness < 7,5 mm mínimo 15 N/mm ²	UNE-EN ISO 10545-4:2012
